

HIGH STRENGTH. HIGH-SECURITY.

When your name is Fortress, security isn't just a feature—it's our foundation. That's why we developed Ajax™ Welded Wire Fencing, a next-generation perimeter security solution built for strength, durability, and versatility. Designed to meet the toughest commercial, industrial, and high-security demands, Ajax™ is constructed from premium galvanized steel with an anti-climb mesh pattern, ensuring uncompromising protection with a modern aesthetic.

KEY FEATURES

- Engineered with precision welding to ensure maximum durability and strength.
- Resistant to impact, vandalism, and tampering.
- Galvanized and powder-coated finishes protect against rust and environmental wear.
- Long-lasting performance in extreme weather conditions.
- Suitable for commercial, industrial, and residential projects.
- Common uses include perimeters for airports, data centers, parks, schools, and critical infrastructure.
- Low maintenance requirements reduce long-term costs.
- Available in multiple panel styles to meet both security and visual needs.
- Customizable options for height, width, and color to fit project specifications.
- Round and square post options

FortressShield TECHNOLOGY

Ajax Welded Wire is crafted using advanced welding technology to ensure superior strength and durability. Each panel undergoes rigorous in-house testing to verify weld integrity and corrosion resistance. Engineered with high-quality coatings, our fencing solutions are designed to withstand harsh environmental conditions while maintaining long-term performance and aesthetics.
